

CONTROLS ENGINEER

This month we hear from **Prime Controls**, a company that has been in Schertz since 2013 and is located at 144 Windy Meadows.

THE COMPANY

We are a systems integration and instrumentation and controls firm specifically structured to meet industrial automation controls needs. We are well-established firm, privately owned, headquartered in Lewisville, Texas, and have approximately 400 employees. We focus on the water, wastewater, hi-tech, and oil/gas industries. We have offices in Texas, Oklahoma, Louisiana, & Arizona, and have been in business for 21 years. Our capabilities include full-service control system integration and we serve as a main automation contractor. We also are a licensed engineering and licensed electrical contractor. Our products and services include process control, plant information, & facilities management systems; UL509 panel shop; emergency response services; planned & preventative maintenance; and instrument calibration/repair.

Company Culture. Mentors are provided to encourage technical growth. Prime Control employees design develop and startup projects. They are expected to take ownership, manage time and priorities, take initiative and have pride in their projects. They are not expected to reinvent the wheel but are provided the best technologies and never get bored.

Best Part of Working Here. It's summed up in our mission statement: 'to provide our customers the highest quality professional services possible while creating and maintaining the best possible workplace environment for our most valued assets – our employees.'

THE POSITION
